

GIANT ATTACHMENTS

Here is a part of our wide range of attachments. The complete range of attachments can be found in the folder "attachments" or on our website www.giant-attachments.com.

WHEEL LO

GIANT wheel loaders are totally designed and managed in Oisterwijk (the Netherlands). TOBROCO-GIANT has started with new models for the existing range. They replace the existing ones. For development, GIANT is using a sophisticated 3D program. Thus before taken a machine, its performance can be tested and the development of the new models TOBROCO-GIANT meets the demands and needs of their customers. GIANT is a specialist in compact wheel loaders. In Holland they build the GIANT wheel loaders with the best suppliers: Kubota, Rexroth, and quality made in Holland!

Also TOBROCO-GIANT offers you a wide range of implements. The majority of them are designed and produced by TOBROCO because of this, the implements are perfect for your GIANT, which is more

WHEEL LOADERS

To fill the needs and demands of her customers TOBROCO offers a wide range of wheel loaders. This range consists out of 25 different types of loaders with a service weight between 1.000 kg and 6.000 kg. In this leaflet, we will show you the range of GIANT with a service weight of 2.350 kg to 2.770 kg. These loaders are powered by a 36 hp Kubota engine or a 45 hp Kubota turbo engine. For further information about other types and implements we refer to our other leaflets or our website (www.tobroco-giant.com).

● V362

The GIANT V362 is with its 36 hp Kubota engine, the lightest loader in this range. This loader has

● V452T & V452T X-TRA

The GIANT V452T and the GIANT V452T X-TRA are our smallest wheel loaders with two gears and

● V452T HD & V452T X-T

Because of the demands of our customers TOBROCO GIANT has de-
